to me

Dear Reverend Deborah

Greetings to you from Berhampur!

Thank you so much for your mail and I am so happy to receive your mail. Many thanks to you for your concern for us.

The construction work of Block B is progressing well. We plan to complete it by December 2023. The wall and plastering of GF are complete. Wall work in FF is going on. Plastering of some areas of the FF is also complete. Fire safety pipelines are being laid. Air-conditioning work will start next week. The work for Modular OT will also start in two weeks' time.

Attaching some pictures of the work in progress.

After we started using our New Block A, our work atmosphere has changed because of the new infrastructure. All of our staff are happy to work in this new and better environment. Our patients and well as their relatives are also happy to be treated in the new setup. It is really a blessing for the hospital and for all of us to have such a new setup.

Once the Block B is complete, the entire In-Patient service will be in a better environment. Our efficiency will certainly improve with better patient outcomes.

I am grateful to you and all in the Methodist church for praying for us and supporting us in our construction work.

Bishop S K Nanda mentioned today about your planned visit to Odisha in January 2024. We will be happy if you can make a program to visit us. Please visit us.

The work in Dengaambo is going well.

With regards

Dr Nanda
